

Privacy

In addition to advising on intellectual property ownership and licensing issues, Delfino Madden attorneys provide guidance on privacy issues, including data privacy matters (such as data collection and sharing), privacy rights in the workplace, and student and parent privacy rights. As part of this practice area, we stay informed of the ever-changing legal landscape of U.S. and international data privacy laws and regulations (including GDPR, FERPA, HIPAA, CCPA, CPRA, and other California privacy laws and regulations), and also focus on the trend of U.S. data privacy laws. We routinely assist with drafting, reviewing and revising confidentiality and nondisclosure agreements, data privacy contracts and addenda, policies and notices, website terms of use and online privacy policies.
